AUDIT FINDINGS

Narrative:

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-audit, on-site audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The PREA onsite audit of the J. Walter Wood Jr. Residential Treatment Facility in Montgomery, Alabama was conducted on June 1-2, 2020 by Elaine Brideschge, from Valley Farms, Arizona, a U.S. Department of Justice certified PREA Auditor for Juvenile Facilities through a contract with PREA Auditors of America.

The purpose of the audit was to determine the degree of compliance with the Federal Rape Elimination Act (PREA) standards.

On April 22, 2020, approximately six weeks in advance of the onsite audit, the facility posted flyers provided by the auditor throughout the facility announcing the upcoming audit. The flyer explained the purpose of the audit and provided residents and staff with the auditors contact information. The flyer was written in English and in Spanish. The facility dated the flyer with the date it was posted, and the auditor has photos of the displayed flyers. The flyers were displayed in three areas to be visible to residents, staff, and visitors.

Pre-audit preparation included a thorough evaluation of all documentation and materials electronically submitted by the facility through the OAS system, along with the data included in the pre-audit questionnaire. The documentation reviewed include agency policies, procedures, forms, education materials, training curriculum and rosters, posters, brochures, and other relevant materials that were provided to determine compliance with the PREA standards. This review prompted questions and requests for additional documentation in a form of an issue log that was submitted to the PREA Coordinator for review and clarification. Responses were submitted to the auditor in a timely manner and prior to the onsite audit. Additional documentation was also submitted by the facility.

The onsite portion of the audit was conducted over a two-day period. The auditor held an entrance meeting to review the audit agenda and discuss the audit process with facility leadership. The auditor conducted interviews with facility leadership, staff, and residents. The interviews were conducted consistent with Department of Justice PREA auditing expectations in content and approach utilizing the PREA Compliance Audit Instrument Interview Guides, as well as individuals selected for interviews (i.e. Facility Director/Superintendent, PREA Coordinator, Agency Head, Compliance Manager, specialized staff, random staff, Medical and Mental Health staff, Human Resource staff, Investigators, and residents.). The auditor was able to ask additional questions to personnel and residents to gain more information about certain practices of the facility. In addition, the auditor was able to verify through interviews specific protocols and clarify documentation submitted.

An extensive facility tour was conducted which included observation of facility configuration, staff supervision of residents, housing, intake, classroom, visitation areas, recreation areas, dining areas, laundry room, and administration areas. The auditor was able to view camera locations, showering areas, toilet facilities, and sleeping rooms. The auditor was able to informally talk to the residents and staff. While on the tour, the auditor was permitted full access to all areas of the facility. Notices of the PREA audit was observed posted in each housing unit. The auditor was escorted by facility staff.

The residents were selected randomly to interview by the auditor using a current roster of residents. The auditor selected residents from both occupied housing units (west and east), to include interviews with 10 random residents. This facility is an all-female facility, ages ranging from 13-18 years of age. At the time of the onsite visit, there were 15 residents listed on the daily roster. There were two residents to interview that met the criteria for residents who reported sexual abuse, disabled and limited English proficient residents, transgendered, intersex, gay, lesbian, and bisexual residents, residents held in isolation, or residents who disclosed prior sexual victimization

Residents were interviewed using the recommended DOJ PREA Compliance Audit Instrument Interview Guides that question their knowledge of a variety of PREA protections generally and specifically their knowledge of reporting mechanisms available to residents to report abuse and harassment. The auditor was able to ask additional questions to residents to gain more information about certain practices of the facility. In addition, the auditor was able to gather information through interviews regarding facility practices that occur in the environment. The auditor asked each resident if they felt safe in the facility, and 100% responded that they feel safe.

Twelve random staff members were interviewed representing day and night shifts. The auditor selected staff randomly and by specialty using a current staff roster. The auditor randomly selected officers per each shift, position assignment, and gender. Five staff who have acted as first responders, one intake staff, and two shift supervisors who conduct unannounced rounds were also interviewed. Selected staff were interviewed using both random and specialty area interview questions. Staff were questioned using the recommended DOJ PREA Compliance Audit Instrument Interview Guides that question their PREA training and overall knowledge of the agency's zero tolerance policy, reporting mechanisms available to residents and staff, the response protocols when a resident alleges abuse, and first responder duties.

The auditor also interviewed specialty staff to include medical staff, mental health staff, human resources staff, staff that monitor retaliation, investigators, and staff who perform risk assessments. The Compliance Manager, PREA Coordinator, Director/Superintendent, Agency Head, and Sexual Abuse Response Team Members were also interviewed. The facility's leadership accommodated the auditor's request to interview specific staff and arranged resident supervision while staff were participating in the interview process.

While at the facility, the auditor reviewed nine resident case records randomly selected by the auditor utilizing a resident roster provided to the auditor by the facility to evaluate screening and intake procedures, resident education, and other general programmatic areas.

The auditor randomly selected and reviewed eight employee files and employee training logs to determine compliance with training mandates and background check procedures. To obtain information about the rape crisis center and advocacy services, a telephonic interview was conducted.

On the final day of the onsite audit, a debriefing was held with the facility's leadership staff. The purpose of the meeting was to summarize preliminary audit findings, next steps of the audit process, and to provide specific feedback to include strengths and areas of improvement as it relates to PREA standards.

AUDIT FINDINGS

Facility Characteristics:

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate or resident population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

AUDIT FINDINGS

Summary of Audit Findings:

The OAS will automatically calculate the number of standards exceeded, number of standards met, and the number of standards not met based on the auditor's compliance determinations. If relevant, the auditor should provide the list of standards exceeded and/or the list of standards not met (e.g. Standards Exceeded: 115.xx, 115.xx..., Standards Not Met: 115.yy, 115.yy). Auditor Note: In general, no standards should be found to be "Not Applicable" or "NA." A compliance determination must be made for each standard. In rare instances where an auditor determines that a standard is not applicable, the auditor should select "Meets Standard" and include a comprehensive discussion as to why the standard is not applicable to the facility being audited.

	<p>The facility is responsible for conducting administrative sexual abuse investigations (including resident-on-resident sexual abuse or staff sexual misconduct). The facility is not responsible for conducting criminal sexual abuse investigations (including resident-on-resident sexual abuse or staff sexual misconduct). Such allegations will be referred to the Montgomery County Sheriff's Department. When conducting a sexual abuse investigation, the agency investigators follow a uniform evidence protocol. Residents are subject to disciplinary sanctions only pursuant to a formal disciplinary process following a criminal finding of guilt for resident-on-resident sexual abuse. In the event a disciplinary sanction for resident-on resident sexual abuse results in the isolation of a resident, the facility policy requires that residents in isolation have daily access to large muscle exercise, legally required educational programming, and special education services. In the event a disciplinary sanction for resident-on-resident sexual abuse results in the isolation of a resident, residents in isolation receive daily visits from a medical or mental health care clinician. In the event a disciplinary sanction for resident-on-resident sexual abuse results in the isolation of a resident, residents in isolation have access to other programs and work opportunities to the extent possible.</p> <p>The facility offers therapy, counseling, or other interventions designed to address and correct the underlying reasons or motivations for abuse.
